

# Solid Edge CAM Pro

## Case study: LCN Mecanica, Spain

### Machining complex automotive components

#### Challenges

- Meet rigorous demands for parts quality, design and manufacturing
- Meet client requests for more geometrically complicated automotive powertrain components

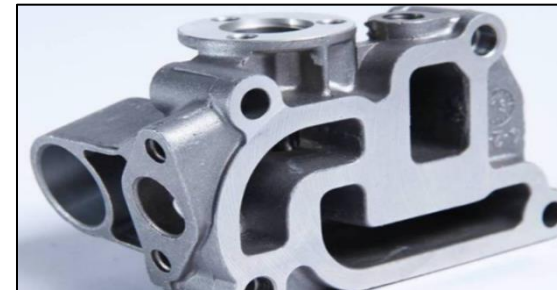

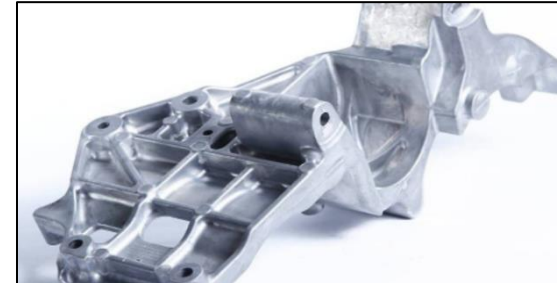

#### Solutions

- Solid Edge for fast design of components and assemblies
- Integrated design and manufacturing with Solid Edge and Solid Edge CAM Pro
- Simulation of machining operations

#### Benefits

- Fast design of products for both OEMs and aftermarket
- Substantially decreased NC programming errors
- Reduce machine programming time by up to 84 percent
